Subject: RE: Bi-Weekly Sampling at Plant GAC Treatment

Hi Andrew,

I contacted Rick Rogers, my Branch Chief about the change in sampling frequency for HFPO-DA at the Washington Works water supply wells. Rick asked to see the data before committing to anything. I will check with him tomorrow on this.

Also, I was asked about the change-out criteria is for the GAC filters at the private residences. I should know this off the top of my head, but I wanted to check with you just to make sure. Thanks for your assistance. Hope all is well.

Roger

Subject: Bi-Weekly Sampling at Plant GAC Treatment

Hello Roger and Jenny,

Back in early 2018 when there were many questions concerning HFPO-DA and the like, we began monitoring the plant GAC Treatment system bi-weekly (i.e., PFOA and HFPO-DA). We have now been doing that for 24 months and have built a considerable database, and have gone through several carbon change outs documenting excellent treatment results.

I just wanted you to know that in May that we plan to go back to the normal "monthly" sampling we are required to do under the WV DOH permit for the treatment system.

Let me know if you see problems with this. We are trying to trim un-necessary costs in these tough economic times.

Thanks.....Andrew
